LG505C User Guide - English

Some of the contents in this manual may differ from your phone depending on the software of the phone or your service provider.
Phone Overview

1. **Earpiece** Lets you hear the caller.

2. **Touch Screen** Displays incoming calls, messages and indicator icons as well as a wide variety of content you select to view.

3. **Shortcuts Key** Allows quick access to a customizable Shortcut Menu.

4. **Quick Keys** The Quick Keys provide easy access to Messages, the phone Dialpad, the Main Menu, and Prepaid which easily activate with the touch of your fingertip.

5. **Send Key** Use to answer incoming calls and to place calls from the Dialpad. From Standby mode, pressing this key will open the All Calls list of your Recent Calls menu.

6. **Clear Key / Voice Commands Key** Deletes single spaces or characters. Also backs out of menus, one level at a time. While in Standby mode, use for quick access to Voice Commands or press and hold to access Voice Recorder.

7. **PWR/End Key** Use to turn the power on/off and to end a call. Also returns to Standby mode.

8. **Earphone Jack** Allows the use of a headset to hear caller’s voice.
1. **Accessory Charger Port** Connects the phone to the battery charger, or other compatible accessories.

2. **Volume Keys** Use to adjust the Master Volume in Standby mode* and the Earpiece Volume during a call.

3. **Lock/Unlock Key** Press to lock or unlock the touch screen and keys.

4. **microSD™ Slot** Accommodates optional microSD cards up to 16GB.

5. **Camera Key** Press for 3 seconds to access the Camera function. When pressed short, Multimedia menu will be available.

Internal Qwerty Keypad

Your phone features a QWERTY keyboard, specifically designed for easy and comfortable text entry. The QWERTY keyboard uses a standard layout.

1. **Function Key** allows you to enter the alternate character (such as ~ for the W key) on the QWERTY keyboard. To lock the function key (as when entering a series of numbers or alternate characters), press twice.

2. **SHIFT Key** lets you change letter capitalization when entering text, using the QWERTY keyboard.

3. **CLEAR Key** Use to delete a letter, words or sentences. Also use it to exit the menu and go back to standby mode.

4. **Enter key** Use to go to next line editing your message.

The Battery

The phone comes with a rechargeable battery. The battery charge level is shown at the top of the LCD screen.

**Note**

It is important to fully charge the battery before initial use of the phone.

**Installing the Battery**

Remove the battery cover. Align the battery contacts with the phone terminals at the top of the battery compartment. Gently push down on the battery until it clicks into place. Replace the battery cover.

**Removing the Battery**

Turn the phone off. Remove the battery cover. Use the fingertip cutout near the bottom of the battery compartment to lift the battery out.

**Charging the Battery**

To use the charger provided with your phone:

*Warning! Use only the charger provided with the phone. Using any charger other than the one included with the LG505C may damage your phone or battery.*
Getting Started with Your Phone

1. Connect the USB data cable into the wall adapter, as shown below.

2. Gently uncover the phone’s accessory/charger port. Then plug the USB data cable (as shown in the next image) into the accessory/charger port and the other end into an electrical outlet. The charge time varies depending upon the battery level.

Notice
Please make sure that the ‘B’ side is facing up before inserting a charger or data cable into the charger port of your phone.

Battery Charge Level
The battery charge level is shown at the top right of the LCD screen. When the battery charge level becomes low, the low battery sensor alerts you in three ways: sounding an audible tone, blinking the battery icon, and displaying a warning message. If the battery charge level becomes exceedingly low, the phone automatically switches off and any function in progress is not saved.

Turning the Phone On and Off

Turning the Phone On
1. Install a charged battery or connect the phone to an external power source.

2. Press 🔄 for about 3 seconds until the LCD screen lights up.
Turning the Phone Off

1. Press and hold \( \text{Home} \) until the display turns off.

Signal Strength

Call quality depends on the signal strength in your area. You can tell how much signal strength you have by the number of bars next to the signal strength icon: the more bars, the stronger the signal. If you’re having problems with signal quality, move to an open area or, when inside a building, try moving near a window.

Screen Icons

To see the icon glossary, go to Menu -> Settings -> Phone Info -> Icon Glossary on your phone.

Making Calls

1. Make sure the phone is turned on. If not, press \( \text{End} \) for about 3 seconds to turn it on.

2. Enter the phone number (include the area code if needed).

3. Press \( \text{Send} \).

4. Press \( \text{End} \) to end the call.

Correcting Dialing Mistakes

If you make a mistake while dialing a number, touch the Clear Key \( \text{Clear} \) once to erase the last digit entered, or hold the Clear Key down to delete all digits.
Redialing Calls

With the touch screen unlocked, press the Send Key once to view a list of all of your recent calls. The last 270 calls (90 Received, 90 Missed and 90 Dialed) are stored in the call history list. Touch the Dial Key next to any of the entries to place a call to that number.

You can also press the Send Key twice to redial the last number you dialed, received or missed in the call history.

Receiving Calls

1. When the phone rings and/or vibrates, press to answer.
2. Press to end the call.

Tip
To choose answer options:
Menu -> Settings -> Call Settings -> Answer Options.

Choose from the following options:
Any Key/Auto with Handsfree/Slide Open(Speakerphone)

Note
If you press or (the side keys), while the phone is ringing, the ringing or vibration is muted for that call.
Quick Access to Convenient Features

Lock Mode
Sets your phone to require a 4-digit password in order to use the phone.

Note
Until you change it, the default lock code/password is the last 4 digits of your phone number.

To set Lock Mode on, touch Menu -> Settings -> Phone Settings -> Security -> Enter the Phone Lock Code -> Lock Phone.

Mute Function
The Mute function is available during a phone call. To quickly activate Mute during a call.

Quick Volume Adjustment
Quickly adjust the Master Volume and Earpiece Volume by pressing the upper Volume Key to increase and lower Volume Key to decrease.

Note
The Earpiece Volume can only be adjusted by the Volume Keys during a call. To turn sounds off, unlock the phone, press and hold the lower Volume Key for 3 seconds, then press and hold the upper Volume Key to return to Normal Mode.

Call Waiting
Your cellular service may offer call waiting. While a call is in progress, a beep indicates another incoming call. When call waiting is enabled, you may put the active call on hold while you answer the other incoming call. Check with your cellular service provider for information about this function.

1. Press the Send Key, to automatically put the first call
on hold and answer the new call.

2. Press the **Send Key** again, to put the second call on hold and return to the first caller.

**Caller ID**

Caller ID displays the phone number or name of the incoming call. If the caller’s identity is stored in Contacts, the name will appear along with the phone number. Check with your service provider for availability.

**Speed Dialing**

Speed dialing is a convenient feature that allows you to make phone calls quickly. A number key can be assigned to a specific phone number. By touching and holding down a number key, your phone will recall the phone number associated from the Contact List and dial that phone number for you. Speed Dial Number 1 is set to Voicemail by default and is unchangeable.

**Dialing Single Digit Speed Dials (from 2 to 9)**

Enter and hold the Speed Dial number.

OR

Enter the Speed Dial number and press **Send**.

**Dialing Double Digit Speed Dials (from 10 to 99)**

Enter the first digit and then touch and hold the key of the second digit.

OR

Enter the first and second digits and press **Send**.
Entering and Editing Information

Text Input

Each time you touch a data entry field, the touchscreen automatically displays a keypad allowing you to enter text, numbers, and symbols. For example, in a text field, an alphabet keypad appears, but you can also switch to number mode to enter digits.

Options:
- Insert Template/Save As Draft/Add/ Priority Level/ Callback #/Save Template/Cancel Message

Handwriting input mode Key.

Touch to delete text.
Contacts in Your Phone’s Memory

The Basics of Storing Contacts Entries

1. Enter the phone number you want to save (up to 48 digits).
2. Touch SAVE and select either Add New Contact or Update Existing on the pop-up screen.
3. Touch a Phone Label. Mobile 1/ Home 1/ Office 1/ Mobile 2/ Fax/ Home 2/ Office 2

*Note*
Use Update Existing to add another phone number to a contact already stored in memory.

4. Touch the Name field and enter a name for the contact (up to 32 characters). Then touch DONE and SAVE. A confirmation message is displayed briefly.

Phone Numbers With Pauses

When you call automated systems, such as voice mail or credit billing numbers, you often have to enter a series of numbers to navigate through the system. Instead of entering these numbers by hand, you can store the numbers in your Contacts separated by special pause characters (W, P). There are two different types of pauses you can use when storing a number:

**Add Wait**
The phone stops dialing until you touch Release to advance to the next number.

**Add 2-Sec pause**
The phone waits 2 seconds before sending the next string of digits.
Contacts in Your Phone’s Memory

Storing a Number with Pause or Wait
1. Touch Menu.
2. Touch CONTACTS.
3. Touch New Contact.
4. Enter a name (up to 32 characters) and enter a number.
5. Touch and select Add Wait or Add 2-Sec Pause.
6. Add Wait / Add 2-Sec pause
7. Enter the additional number(s), touch DONE and then SAVE.

Adding a Pause or Wait to an Existing Number
1. Touch Menu.
2. Touch CONTACTS.
3. Touch Contact List.
4. Scroll through the list and touch the Contact entry you wish to edit.
5. Touch EDIT.
6. Touch the number.
7. Touch .
8. Touch Add Wait or Add 2-Sec Pause.
9. Enter the additional number(s), touch DONE and then SAVE.

Searching Your Phone’s Memory
The LG505C phone is able to perform a dynamic search of the contents in your phone’s Contact List. A dynamic search compares entered letters or numbers on the Dialpad against the entries in your Contacts. A matching list is displayed in descending order. You can then select a number from the list to call or view it.
Contacts in Your Phone’s Memory

Searching by Letter

1. Touch  to display your contacts alphabetically.
2. Touch Go To followed by the key(s) on the alphanumeric keypad that corresponds with the letters in the Contact’s name. The matching contacts will be displayed.

Scrolling Through Your Contacts

1. Touch  to display your contacts alphabetically.
2. Use your finger to scroll up and down through the list.

Contacts Options

1. Touch Menu.
2. Touch .
3. Touch Right Option Key Options.
4. Select an option.

Send via Bluetooth: Send a contact (vCard) via Bluetooth®.
Delete: Delete the selected entry in your Contacts.
Message: Send a text message or picture message to the selected contact.
Lock/Unlock: Edit the selected contact information.

Making a Call From Your Phone’s Memory

Once you have stored phone numbers in your Contacts, you can place calls to those numbers quickly and easily.

• By touching a phone number in Contacts or Call History and pressing or touch .
Contacts in Your Phone’s Memory

- By using Speed Dialing.

From Contacts
1. Touch ✆.
2. Touch CONTACTS.
3. Touch the phone number.

From Call History
1. Touch ☐ Menu.
2. Touch ☐ Recent Calls.
3. Touch the type of recent call.
   - Missed Calls/Received Calls/Dialed Calls/All Calls
4. Touch phone number.
5. Touch ✆ or press ☞ to call.

Speed Dialing
For a single-digit Speed Dial, press and hold the digit or press the digit, then press ☞. For a double-digit Speed Dial, press the first digit and hold the second digit or press the first and second digits, then press ☞ to call.
Using Phone Menus

Prepaid

The Prepaid Menu provides shortcuts to access useful account information.

1. Add Airtime
Add Airtime allows you to start an over-the-air request for additional airtime.
1. Touch ,.

Serial Number simply displays the phone’s serial number.
1. Touch ♡, ♢.
2. Touch Serial Number.

7. Code Entry Mode
Code Entry Mode will allow the phone to accept Tracfone related codes in order to add units, modify specific data, and troubleshoot the phone. In using the Code Entry Mode, you can’t receive incoming calls or use events alerts.
1. Touch ♡, ♢.
2. Touch Code Entry Mode.

Contacts
The Contacts Menu allows you to store names, phone numbers and other information in your phone’s memory.

1. New Contact
Allows you to add a new contact to your Contact List.

Note
Using this submenu, the number is saved as a new Contact. To save the number into an existing Contact, edit the Contact entry.
1. Touch ♡.
2. Touch Contacts ♠.
3. Touch New Contact.
4. Enter the name.
5. Continue entering Contact information by touching the corresponding field and entering the desired information.

6. Touch **SAVE** to save the new contact.

**2. Contact List**

Allows you to view your Contact List.

1. Touch ✉.

2. Touch Contacts 📞.

3. Touch Contact List.

4. Choose from the following options:
   - Scroll through your Contacts alphabetically.
   - Touch 📞 to select one of the following options:

5. Touch ✉ to save the new contact.

   - Send via Bluetooth/
     Delete / Message / Lock / Unlock

3. **Groups**

Allows you to view your grouped Contacts, add a new group, change the name of a group, or delete a whole group.

1. Touch ✉.

2. Touch Contacts 📞.

3. Touch Groups.

4. Choose from the following options:
   - Touch a group to view.
   - Touch a group, then touch 📞 to choose from the following options:

   - Remove/ New Text
   - Message/ New Picture
Contacts

4. My vCard
Allows you to view all of your personal Contact information including name and phone numbers.

1. Touch 📞.
2. Touch Contacts 📷.
3. Touch My vCard.
4. Touch Edit.
5. Touch the field you want to edit.
6. Edit the information as necessary and touch Save.

Note
You cannot edit your mobile phone number, but you can add an additional phone number.

5. Speed Dials
Allows you to view your Speed Dials list, designate new Speed Dials, or remove Speed Dial designations entered in your Contacts.

1. Touch 📞.
2. Touch Contacts 📷.
3. Touch Speed Dials.
4. Touch the desired Unassigned number list.
5. Touch the Contact you would like to assign a Speed Dial to. A confirmation message is displayed.
Messages

The phone can store up to 835 messages, including a maximum of 500 SMS and 100 MMS messages 100 MMS notification messages in the Inbox, 50 SMS and 50 MMS in the Outbox, and 15 SMS and 20 MMS in the Draft. The information stored in the message is determined by phone model and service capability. Other limits such as available characters per message may exist. Please check with your service provider for system features and capabilities.

1. New Text Message

Allows you to send text messages and e-mail. Each message will be formatted and sent according to the destination address.

The Basics of Sending a Text Message

2. Touch Enter Number to manually enter the address or to add the address from your Contacts List.

Allows you to initiate an Web session.

1. Touch  

2. An air time charges prompt can appear if the setting is enabled.

3. After a few seconds, you will see the home page.

Ending an Web Session

End an Web session by pressing  .

Navigating Through the Browser

On-screen items may be presented in one of the following ways:

- Numbered options
  You can use your numeric
keypad or you can select the items by moving the cursor and pressing the appropriate Option Key(s).

- **Links embedded in content**
  You can act on the options or the links by using the Option Keys at the bottom of the display screen.

- **Text or numbers**
  You can select the items by moving the cursor and pressing the appropriate Option Keys.

**Scrolling**

Touch to scroll through the content if the current page does not fit on one screen. The currently selected item is indicated by a cursor on the screen.

**Fast Scrolling**

Touch to quickly move the cursor up and down on the current screen.

**Option Keys**

The Option Key is used primarily for first options or selecting an item, but its function may change depending on the content displayed.

The Right Option Key is used primarily for secondary options or a menu of secondary options.

**Entering Text, Numbers, or Symbols**

When prompted to enter text, the current text entry method appears above the Right Option Key as ABC(ABC/abc), Sym,
123, etc. To change the input mode, touch the Right Option Key 8. To change to upper case, touch 8*.

Clearing Out Text/Numbers Entered
When entering text or numbers, touch clear the last number, letter, or symbol. Touch and hold clear the input field completely.

Initiating a Phone Call From Web
You can make a phone call from Web if the site you are using supports the feature. The browser connection is terminated when you initiate the call. After you end the call, your phone returns to the screen from which you initiated the call.

Multimedia

1. Take Photo
1. Touch 8, Take Photo.
2. Touch access the following camera options:
   - Brightness
   - WBWhite Balance
   - Settings
   - Take
   - Gallery

3. Touch the Gallery to access My Images or touch the Right Option Key 8 Options for the following options:
   - Options Tab
     Send
     Take Picture
     Delete
Lock/Unlock
Delete All

- Settings Tab

ShutterSound  None/ Sound 1/ Sound 2/ Sound 3/ Say Cheese
ColorEffects  Color/ Sepia/ mono/ Negative
SelfTimer
NightMode  On/Off
NoiseReduction
AutoSave  On/Off
SaveOptions

4. Take a picture by touching Capture.

5. Select Send or View after the picture is taken. Send will open a new Picture Message. View will offer the following options:

- Delete
- Send to send by Picture Message, via Bluetooth, or to your Online Album.
- Save
- Set As to set as the Wallpaper or as a Picture ID.

2. Record Voice
Record Voice allows you to record short verbal/voice messages.

1. Touch , , Record Voice.

2. Touch RECORD to record a new voice memo.

3. Talk into the microphone, then touch STOP. The default memo title is the date and time of recording.

Set As/Send Picture Message/Send Via
Multimedia

Bluetooth/Delete/Rename/Lock/Delete All/File Info

3. My Stuff

3.1. Images
Images allows you to view your saved images, some of which can be set as your phone’s Main Screen or Picture ID.

1. Touch My Stuff, Images.
2. Select Gallery/ Buy Graphics then touch.
3. Highlight the image you want to display.

- Touch Right Option Key Options to access and apply options.
- Touch OK View to view the selected image.

- Touch Option Key Send to send the selected image to somebody else. (This option is only available in My Images).

3.2. Sounds
Audios allows you to access saved audio clips and record new ones.

1. Touch My Stuff, Sounds.
2. Select the My Sounds/ Default Sounds/ Buy Ringtones folder or one of the files listed, then touch.

- Touch Option Send to send the selected audio clip to somebody else.
- Touch Play to play the selected audio clip.
- Touch Options to access and apply options.
My Schedule

1. Alarm Clock
Allows you to set up to ten alarms. At the alarm time, any set alarm will sound and/or vibrate the tone of your choice (depending on your sound settings), and a notification message will be displayed on your screen.

1. Touch  
2. Touch My Schedule  
3. Touch Alarm Clock, then ADD .
4. Touch the Set Time field to set the alarm time.
5. Touch the Repeat field to set the recurrence for the alarm. Available options are:
   - Once
   - Daily
   - Mon - Fri
   - Weekends
   - Select Days
6. Touch the Ringtone field to set the ringtone for the alarm.
7. Touch SAVE to save.

2. Calendar
Allows you to store and access your agenda(s). Simply store your appointments in your Calendar and your phone will alert you with a reminder.

1. Touch  
2. Touch My Schedule  
3. Touch Calendar.
4. Touch the day you wish to edit.
5. Touch ADD .
My Schedule

6. Enter your schedule information including:
   - Subject
   - Start Time
   - End Time
   - Repeat
   - Until
   - Alerts
   - Tones
   - Vibrate

7. Touch **SAVE**.

3. **Notepad**

Allows you to add, read, edit, and erase notes to yourself.

1. Touch **epad**.
2. Touch **My Schedule**
3. Touch **Notepad**.
4. Touch **ADD** to write a new note.
5. Type the note, then touch **SAVE**.

A confirmation message displays briefly, then displays your list of notes.

Viewing a Notepad Entry

1. Access Notepad.
2. To erase a note, touch it to open it. Then, touch **ADD**.

- Or -

To add a note or erase all of the notes, touch **ADD** or **DELETE ALL**.
Tools

Your phone is equipped with helpful tools, including: Voice Command, Calculator, Ez Tip Calculator, World Clock, Unit Converter, Drawing Panel, Stopwatch

1. Voice Command

Allows you to make phone calls quickly and easily by voice. Your phone recalls the number from your Contacts, displays it briefly, and then dials it. This menu also includes features that are useful for those who are driving or blind. It delivers time information by voice and allows you to check missed calls, messages and voicemails.

1.1. Call <Name> or <Number>

1. Touch , Voice Command, Call <Name> or <Number>.

2. Say the name as it is saved in your Contact List or say the number.

1.2. Send Msg to <Name or Number or Group>

1. Touch , Voice Command, Send Msg to <Name or Number or Group>.

1.3. Check <Item>

1. Touch , Voice Command, Check <Item>.

1.4. Contacts <Name>

1. Touch , Voice Command, Contacts <Name>.
Tools

1.5. Play
1. Touch Voice Command, Play.

1.6 Help
Allows you to view more information about the features in Voice Control.

2. Calculator
Allows you to perform simple mathematical calculations. You can enter numbers up to the ninth decimal place.
1. Touch Calculator.
2. Enter data.
   - Use keypad to enter numbers.
   - Use enter decimals.

3. Ez Tip Calculator
Allows you to quickly and easily estimate the tip and total amount of a bill by inputting the bill amount before tip, the tip percentage, and dividing it by the number of people paying.
1. Touch Ez Tip Calculator.
2. Enter the variable fields (Bill, Tip(%), Split).
3. Touch RESET for another calculation.
4. World Clock
Allows you to determine the current time in another time zone or country.
1. Touch World Clock.
2. Touch SELECT to check other time zone or country.
3. Touch to select other country and touch CITIES.
4. Touch to scroll through all available cities on the map.
5. Touch SAVE to save world clock.
6. Touch SAVE.

5. Unit Converter
Allows you to convert units of Area, Length, Temperature, Mass, Volume and Velocity.
1. Touch Unit Converter.
2. Touch the unit of measurement you want to convert:
   Currency/ Area/ Length/ Mass/ Temperature/ Volume/ Velocity

6. Drawing Panel
This function allows you to draw freely so that you can save the image, send it in a message or set it as a Wallpaper.
1. Touch .
2. Touch Tools .
3. Touch Drawing Panel.
Tools

4. Touch **ADD** to create a new drawing.

Create a drawing, then touch ✉ to save it.

A confirmation message displays briefly, then displays your list of drawings.

Options for a Drawing Pad Entry

1. Access Drawing Pad and select the desired drawing.

2. To erase, touch **DELETE**.

   To edit, touch **EDIT**.

   To send as a Picture Message, touch **SEND**.

7. Stopwatch

   Allows you to use the Stopwatch function of the phone.

   1. Touch ☐, ☐, Stopwatch.

   2. Touch **START** to start, and Touch **STOP** to stop.

   - You can use the Lap function by touching **LAP** to record up to 20 laps and lap times.
Settings

1. Sound Settings
This menu allows you to customize the phone’s sounds.

1.1 Master Volume
1. Touch 📡.

2. Touch Settings 📡.

3. Touch Sound Settings and Master Volume.

1.2 Call Sounds
Allows you to configure your phone’s call sounds.

1. Touch 📡.

2. Touch Settings 📡.

3. Touch Sound Settings and Call Sounds. Touch Call Ringtone/Call Vibrate/Caller ID Readout/Buy Ringtones.

2.2 Keypad Backlight
1. Touch .
2. Touch Settings .
4. Touch a duration time:
   7 Seconds/ 15 Seconds/ 30 Seconds/ Always Off

2.3 Wallpaper
Allows you to choose the kind of background to be displayed on the phone.
1. Touch .
2. Touch Settings .
3. Touch Display Settings and Wallpaper.
4. Touch the desired image, then touch SET and ADJUST

2.4 Charging Screen
1. Touch .
2. Touch Settings .
3. Touch Display Settings and Charging Screen.

2.5 Themes
1. Touch .
2. Touch Settings .
3. Touch Display Settings and Themes.

2.6 Font Settings
Allows you to select the type of font displayed on the LCD screen.
1. Touch .
2. Touch Settings .
3. Touch **Display Settings** and **Font Settings**.

**Space/Cartoon**

4. Touch a setting.

**LG Gothic/ LG Serif/LG Joy**

### 2.7 Dial Font Size

Allows you to set the font size on the Dialpad when dialing a number.

1. Touch 📡.

2. Touch Settings 📡.

3. Touch **Display Settings** and **Dial Font Size**.

4. Touch a setting.

**Normal/ Large**

### 2.8 Clock Format

Allows you to select the type of clocks displayed on the Main Homescreen.

1. Touch 🕒.

2. Touch Settings 📡.

3. Touch **Display Settings** and **Clock Format**.

4. Use your finger to slide from left to right (and vice versa) through the available options:

   **Normal/ Analog/ Digital 12/ Large Digital 12/ Digital 24/ Large Digital 24/ Dual/ Off**

### 2.9 Name Match for Dialing

Matches a saved Contact entry with the corresponding letters entered on the Dialpad.

1. Touch 📡.

2. Touch Settings 📡.

3. Touch **Display Settings**.

4. Touch the **Name Match for Dialing** button to toggle the
setting between ON and OFF.

3. Call Settings

The Call Settings menu allows you to designate how the phone handles both incoming and outgoing calls.

3.1 Answer Options

Allows you to determine how to answer an incoming call.

1. Touch 📞.
2. Touch Settings 🛠.
3. Touch Call Settings, and Answer Options.
4. Touch a setting.
   - Any Key/ Auto with Handsfree/ Slide Open(Speakerphone)

3.2 Auto Retry

Allows you to set the length of time the phone waits before automatically redialing a number when the attempted call fails.

1. Touch 📞.
2. Touch Settings 🛠.
3. Touch Call Settings, and Auto Retry.
4. Touch a setting.
   - Off/ Every 10 Seconds/ Every 30 Seconds/ Every 60 Seconds

3.3 TTY Mode

Allows you to attach a TTY (Teletype writer) device enabling you to communicate with parties also using a TTY device. A phone with TTY support is able to translate typed characters to
voice. Voice can also be translated into characters and then displayed on the TTY.

1. Touch 📞.

2. Touch Settings 🛠.

3. Touch Call Settings, and TTY Mode.

4. Read the disclaimer and touch OK.

5. Touch a setting.
   - TTY Full/ TTY + Talk/ TTY + Hear/ TTY Off

3.4 One Touch Dial

Allows you to initiate a Speed Dial call by pressing and holding the Speed Dial digit. If set to Off, Speed Dial numbers designated in your Contacts will not function.

1. Touch 📞.

2. Touch Settings 🛠.

3. Touch Call Settings, and TTY Mode.

4. Touch the One Touch Dial button to toggle the setting between ON and OFF.

3.5 Voice Privacy

Allows you to set the voice privacy feature for CDMA calls as Enhanced or Standard. CDMA offers inherent voice privacy. Check with your service provider for availability.

1. Touch 📞.

2. Touch Settings 🛠.

3. Touch Call Settings, and Voice Privacy.

4. Touch a setting.
   - Enhanced/ Standard.
4. Touch Settings

4.1 Auto Touch Lock
Allows you to set Auto Touch Lock.
1. Touch 🔄.
2. Touch Settings 🔄.
3. Touch Touch Settings and Auto Touch Lock.
4. Touch a setting.
   On/Off

4.2 Vibrate Type
Allows you to set the vibrate type that is used when touching items on the screen.
1. Touch 🔄.
2. Touch Settings 🔄.
3. Touch Touch Settings and Vibrate Type.
4.3 Vibrate Level
Allows you to set the vibrate level that is used when touching items on the screen.
1. Touch 🔄.
2. Touch Settings 🔄.
3. Touch Touch Settings and Vibrate Level.
   Off/Low/Medium/High

4.4 Tone Type
Allows you to set the tone type that is used when touching items on the screen.
1. Touch 🔄.
2. Touch Settings 🔄.
3. Touch Touch Settings and Tone Type.
   Short/Double/Lang
4.5 Calibration

Allows you to calibrate the touchscreen to ensure it is working properly.

1. Touch  
2. Touch Settings  
3. Touch Touch Settings and Calibration.
4. Touch the screen to start calibration, then touch the target each time it appears.

5. Phone Settings

5.1 Airplane Mode

Airplane Mode turns off the phone’s wireless signal and allows you to use features on your phone that do not require wireless communications.

1. Touch  
2. Touch Settings  
3. Touch Phone Settings, and Airplane Mode.
4. Touch a setting.

ON/ OFF
5.2 Languages

Allows you to set the bilingual feature according to your preference. Choose between English and Español.

1. Touch 📞.
2. Touch Settings 📞.
3. Touch Phone Settings and Languages.
4. Touch English or Español.

5.3 Location

Allows you to set your settings for GPS (Global Positioning System: Satellite assisted location information system) mode.

1. Touch 📞.
2. Touch Settings 📞.
3. Touch Phone Settings and Location.

4. Touch a setting.

**Location On/E911 Only**

**Note**

GPS satellite signals are not always transmitted, especially under bad atmospheric and environmental conditions, indoors etc.

5.4 Security

The Security menu allows you to change Security and Restriction settings.

5.4.1 Change Lock Code

Allows you to enter a new four-digit Lock Code.

1. Touch 📞.
2. Touch Settings 📞.
3. Touch Phone Settings, Security.
4. Enter the four-digit Lock Code.

5. Touch Change Lock Code.

6. Touch Phone Only or Camera.

7. Enter a new 4-digit Lock Code.

8. For confirmation, it will ask you to enter the new Lock Code again.

### 5.4.2 Restrictions

Allows you to restrict incoming and/or outgoing calls and messages. Also provides the option to restrict Data.

1. Touch 📞.

2. Touch Settings 🔄.

3. Touch Phone Settings and Security.

4. Enter the four-digit Lock Code.

5. Touch Restrictions and enter the Lock Code.

6. Touch a Restrictions submenu, then the setting.

   - **Incoming Calls/Outgoing Calls** (Allow All/Contacts Only/Block All)
   - **Incoming SMS/Outgoing SMS** (Allow All/Block All)
   - **Incoming MMS/Outgoing MMS** (Allow All/Block All)
   - **Data** (UNLOCK/Lock)

### 5.4.3 Lock Phone

Keeps your phone from unauthorized use. Once the phone is locked, it is in restricted mode until the Lock Code is
entered. You can still receive phone calls and make emergency calls. You can modify the Lock Code by navigating to the Change Lock Code menu within the Security menu.

1. Touch 

2. Touch Settings 

3. Touch Phone Settings and Security.

4. Enter the four-digit Lock Code.

5. Touch Lock Phone.

6. Touch an option.

  - **None** The phone is never locked (Lock mode can still be used using the options below).

  - **When Switch On** The phone is locked when it is turned on.

5.4.4 Reset Default

5.5 System Select

Allows you to set up the phone producer’s management environment. Leave this setting as the default unless you want to alter system selection as instructed by your service provider.

1. Touch 

2. Touch Settings 

3. Touch Phone Settings and System Select.

4. Touch a setting.

   - Home Only/ Automatic

6. Bluetooth

The LG505C is compatible with devices that support the Bluetooth® headset, stereo headset and hands-free
profile(s)*. You may create and store 20 pairings within the LG505C and connect to one device at a time. The approximate communication range for Bluetooth® wireless technology is up to 30 feet (10 meters).

**Notes**

• Read the user guide of each Bluetooth® accessory that you are trying to pair with your phone because the instructions may be different.

• The Bluetooth® features of this handset may not be compatible with all Bluetooth® enabled devices. Your service provider or handset manufacturer cannot be held responsible for compatibility issues with devices not sold by the service provider or handset manufacturer.

6.1 Power

Allows you to turn the power on or off.

1. Touch 📲.

2. Touch Settings 📁.

3. Touch the Bluetooth button to turn the feature TURN ON or TURN OFF.

**Note**

By default, your device’s Bluetooth® functionality is turned off.

6.2 Add New

Pairing is the process that allows the handset to locate, establish and register a 1-to-1 connection with the target device.
Pairing a new Bluetooth® device

1. Touch 📹.
2. Touch Settings 📌.
3. Touch Bluetooth and ADD 📌.
4. Follow the Bluetooth® accessory instructions to set the device to pairing mode.
5. If Bluetooth® power is set to off, you will be prompted to turn power on. Touch Yes.
6. The device will appear in the Device Found menu once it has been located. Touch the device.
7. The handset may prompt you for the passkey. Consult the Bluetooth® accessory instructions for the appropriate passkey (typically “0000” - 4 zeroes). Enter the passkey and touch OK 📌. Or it may prompt you to confirm matching passkeys on both handsets.
8. Once pairing is successful, you will be asked to choose Always Ask or Always Connect. This sets connection preferences for the Paired Device.
9. Once connected, you will see the device listed in the Paired Devices menu.

6.3 Settings

Allows you to configure Bluetooth settings.

6.3.1 My Device Info

Allows you to edit the name of the Bluetooth® device.

1. Touch 📌.
Settings

2. Touch **Settings**.
4. Touch **RENAME DEVICE**.
5. Press and hold down ← to clear the existing name.
6. Enter a new alias.
7. Touch **SAVE** to save and exit.

**6.3.2 Discovery Mode**

Allows you to set the visibility of your Bluetooth® feature.

1. Touch 📱.
2. Touch Settings 📱.
3. Touch Bluetooth, 📱 and Discovery Mode.
4. Touch a setting. On/ Off

**Note**

If you turn on My Visibility, your device is able to be searched by other in-range Bluetooth® devices.

**6.3.3 Supported Profiles**

Allows you to view the Bluetooth profiles your phone supports.

1. Touch 📱.
2. Touch Settings 📱.
3. Touch Bluetooth, 📱 and Supported Profiles.

7. USB Connection

Allows you to select the PC connection mode for your device.

1. Touch  
2. Touch Settings  
3. Touch USB Connection.
4. Touch a setting.
   - USB Modem, USB Mass Storage, Setting Reminder

8. Memory

Allows you to check out the memory status of your phone.

1. Touch  
2. Touch Settings  
3. Touch Memory.
4. Touch an option:
   - Phone Memory, Card Memory, Save Options

Note

When Clear All is set on External Memory, all contents including locked contents are removed.

9. Phone Info

The Phone Info menu provides you with specific information pertaining to your phone model.

1. Touch  
2. Touch Settings  
3. Touch Phone Info.

9.1 My Number

Allows you to view your phone number.

1. Touch  
2. Touch Settings  

3. Touch **Phone Info** and **My Number**.

### 9.2 ESN/MEID

Allows you to view the ESN/MEID information of your phone.

1. Touch 📱.
2. Touch **Settings** 🛠.
3. Touch **Phone Info** and **ESN/MEID**.

### 9.3 Icon Glossary

Allows you to view all the icons and their meanings.

1. Touch 📱.
2. Touch **Settings** 🛠.
3. Touch **Phone Info** and **Icon Glossary**.
4. Touch a submenu to view that type of icon.

### 9.4 SW/HW Version

Allows you to view the versions of various applications.

1. Touch 📱.
2. Touch **Settings** 🛠.
3. Touch **Phone Info** and **SW/HW Version**.

### 9.5 Software Update

1. Touch 📱.
2. Touch **Settings** 🛠.
3. Touch **Phone Info** and **Software Update**.
Important Information
This user guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment. Any changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

Before You Start

Safety Instructions
WARNING! To reduce the possibility of electric shock, do not expose your phone to high humidity areas, such as the bathroom, swimming pool, etc.

Always store your phone away from heat. Never store your phone in settings that may expose it to temperatures less than 32 °F or greater than 104 °F, such as outside during extreme weather conditions or in your car on a hot day. Exposure to excessive cold or heat will result in malfunction, damage and/or catastrophic failure.
For Your Safety

Be careful when using your phone near other electronic devices. RF emissions from your mobile phone may affect nearby in adequately shielded electronic equipment. You should consult with manufacturers of any personal medical devices such as pacemakers and hearing aids to determine if they are susceptible to interference from your mobile phone.

Turn off your phone in a medical facility or at a gas station. Never place your phone in a microwave oven as this will cause the battery to explode.

IMPORTANT! Please read the TIA SAFETY INFORMATION on page 94 before using your phone.

Safety Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

- Do not disassemble this unit. Take it to a qualified service technician when repair work is required.

- Keep away from electrical appliances such as TVs, radios, and personal computers.

- The unit should be kept away from heat sources such as radiators or cookers.

- Do not drop.

- Do not subject this unit to mechanical vibration or shock.
• The coating of the phone may be damaged if covered with wrap or vinyl wrapper.

• Use dry cloth to clean the exterior of the unit. (Do not use solvent such as benzene, thinner or alcohol.)

• Do not subject this unit to excessive smoke or dust.

• Do not keep the phone next to credit cards or transport tickets; it can affect the information on the magnetic strips.

• Do not tap the screen with a sharp object; otherwise, it may damage the phone.

• Do not expose the phone to liquid or moisture.

• Use the accessories like an earphone cautiously. Do not touch the antenna unnecessarily.

**Memory card information and care**

• The memory card cannot be used for recording copyright-protected data.

• Keep the memory card out of the small children’s reach.

• Do not leave the memory card in extremely hot location.

• Do not disassemble or modify the memory card.
For Your Safety

FCC RF Exposure Information

WARNING! Read this information before operating the phone.
In August 1996, the Federal Communications Commission (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.
The design of this phone complies with the FCC guidelines and these international standards.

CAUTION
Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement antenna.

Body-worn Operation
This device was tested for typical body-worn operations with the back of the phone kept 0.79 inches (2cm) between the user’s body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.79 inches (2cm) must be maintained between the user’s
body and the back of the phone. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.79 inches (2cm) separation distance between the user’s body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

**FCC Part 15 Class B Compliance**

This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

**Part 15.105 statement**

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of
For Your Safety

the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Cautions for Battery

- Do not disassemble or open, crush, bend or deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified. Only use the battery with a charging system that has been qualified with the system per this standard. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725 - 200x.
Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.

- Promptly dispose of used batteries in accordance with local regulations.

- Battery usage by children should be supervised.

- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.

- Improper battery use may result in a fire, explosion or other hazard.

- For those host devices that utilize a USB port as a charging source, the host device’s user manual shall include a statement that the phone shall only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.

**Adapter (Charger) Cautions**

- Using the wrong battery charger could damage your phone and void your warranty.

- The adapter or battery charger is intended for indoor use only.

Do not expose the adapter or battery charger to direct sunlight or use it in places with high humidity, such as the bathroom.
Avoid damage to your hearing

- Damage to your hearing can occur if you are exposed to loud sound for long periods of time. We therefore recommend that you do not turn on or off the handset close to your ear. We also recommend that music and call volumes are set to a reasonable level.

- If you are listening to music while out and about, please ensure that the volume is at a reasonable level so that you are aware of your surroundings. This is particularly imperative when attempting to cross the street.

TIA Safety Information

Provided herein is the complete TIA Safety Information for Wireless Handheld phones. Inclusion of the text covering Pacemakers, Hearing Aids, and Other Medical Devices is required in the owner’s manual for CTIA Certification. Use of the remaining TIA language is encouraged when appropriate.

Exposure to Radio Frequency Signal

Your wireless handheld portable telephone is a lowpower radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously
Safety Guidelines

set by both U.S. and international standards bodies:

ANSI C95.1 (1992) *
NCRP Report 86 (1986)
ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

* American National Standards Institute; National Council on Radiation Protection and Measurements; International Commission on Non-Ionizing Radiation Protection

The design of your phone complies with the FCC guidelines (and those standards).

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

Phone Operation

NORMAL POSITION: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

Tips on Efficient Operation

For your phone to operate most efficiently:

- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.
Safety Guidelines

Driving

Check the laws and regulations on the use of wireless phones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:

- Give full attention to driving - driving safely is your first responsibility;
- Use hands-free operation, if available;
- Pull off the road and park before making or answering a call if driving conditions so require.

Electronic Devices

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.
Persons with pacemakers:

- Should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON;
- Should not carry the phone in a breast pocket.
- Should use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult AT&T.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Health Care Facilities

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to external RF energy.
Safety Guidelines

Vehicles
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities
Turn your phone OFF in any facility where posted notices so require.

Aircraft
FCC regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an aircraft.

Blasting Areas
To avoid interfering with blasting operations, turn your phone OFF when in a ‘blasting areas or in areas posted: ‘Turn off two-way radio’. Obey all signs and instructions.

Potentially Explosive Atmosphere
Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, marked clearly. Potential areas may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied
petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

For Vehicles Equipped with an Air Bag
An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Charger and Adapter Safety
- The charger and adapter are intended for indoor use only.

Battery Information and Care
- Please dispose of your battery properly or take it to your local wireless carrier for recycling.
- The battery does not need to be fully discharged before recharging.
- Use only LG-approved chargers specific to your phone model since they are designed to maximize battery life.
- Do not disassemble or impact the battery as it may cause electric shock, short-circuit, and fire. Store the battery in a
Safety Guidelines

- Place out of reach of children.
- Keep the battery’s metal contacts clean.
- Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
- Recharge the battery after long periods of non-use to maximize battery life.
- Battery life will vary due to usage patterns and environmental conditions.
- Use of extended backlighting, MEdia Net Browsing, and data connectivity kits affect battery life and talk/standby times.
- The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal state. In this case, remove the battery from the phone, reinstall it, and turn the phone on.
- Actual battery life will depend on network configuration, product settings, usage patterns, battery and environmental conditions.

Explosion, Shock, and Fire Hazards

- Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.
- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when
Safety Guidelines

- When using the power plug, ensure that it is firmly connected.

- If it is not, it may cause excessive heat or fire. If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.

- Do not short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.

General Notice

- Using a damaged battery or placing a battery in your mouth may cause serious injury.

- Do not place items containing magnetic components such as a credit card, phone card, bank book or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.

- Talking on your phone for a long period of time may reduce call quality due to heat generated during use.

- When the phone is not used for a long period time, store it in a safe place with the power
Safety Guidelines

cord unplugged.

- Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.

- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized Service Center to replace the damaged antenna.

- Do not immerse your phone in water. If this happens, turn it off immediately and remove the battery. If the phone does not work, take it to an LG Authorized Service Center.

- Do not paint your phone.

- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.

- When you use the phone in public places, set the ring tone to vibration so as not to disturb others.

- Do not turn your phone on or off when putting it in your ear.

FDA Consumer Update

The U.S. Food and Drug Administration Center for Devices and Radiological Health Consumer Update on Mobile Phones.

1. Do wireless phones pose a health hazard?
The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the Home screen. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is the FDA’s role concerning the safety of wireless phones?

Under the law, the FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, the FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace, or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the wireless phone industry to take a number
Safety Guidelines

of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

The FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Occupational Safety and Health Administration (Administración de la seguridad y salud laborales)
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission.
(FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. The FCC relies on the FDA and other health agencies for safety questions about wireless phones.

The FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term ‘wireless phone’ refers here to handheld wireless phones with built-in antennas, often called ‘cell’, ‘mobile’, or ‘PCS’ phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user’s head. These RF exposures are limited by FCC safety guidelines that were developed with the advice of the FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called ‘cordless phones,’ which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.
4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer causing chemicals so as to be predisposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don’t know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.
5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is the FDA doing to find out more about the possible health effects of wireless phone RF?

The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF). The FDA has been a leading participant in the World Health Organization International
Safety Guidelines

Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues. The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much radio frequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radio frequency energy (RF) exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg).
The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body’s ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your phone’s RF exposure level in the online listing.

8. What has the FDA done to measure the radio frequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radio frequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, ‘Recommended Practice for Determining the Spatial- Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques,’ sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency
of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?

If there is a risk from these products - and at this point we do not know that there is - it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure. If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using
wireless phones?
The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?
Radio frequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device
manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a ‘compatible’ phone and a ‘compatible’ hearing aid at the same time. This standard was approved by the IEEE in 2000. The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, please refer to the following resources:
- FDA web page on wireless phones (http://www.fda.gov/Radiation-EmittingProducts/RionEmittingProductsandProcedures/HomeBusinessandEntertainment/CellPhones/default.htm)
- Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)
- International Commission on Nonionizing Radiation Protection (http://www.icnirp.de)
- World Health Organization (WHO) International EMF Project (http://www.who.int/peh-emf/)
10 Driver Safety Tips

Your wireless phone gives you the powerful ability to communicate by voice almost anywhere, anytime. An important responsibility accompanies the benefits of wireless phones, one that every user must uphold. When operating a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

2. When available, use a hands-free device. A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.

3. Position your wireless phone within easy reach. Make sure you place your wireless phone within easy reach and where you can reach it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your voicemail
answer it for you.

4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

5. Do not take notes or look up phone numbers while driving. If you are reading an Address Book or business card, or writing a “to-do” list while driving a car, you are not watching where you are going. It is common sense. Don’t get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.

6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simple tip—dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix; they are distracting and even dangerous when you are behind the wheel of a car. Make people you are talking with aware you are driving and if necessary, suspend conversations which have the
potential to divert your attention from the road.

8. Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations — with your phone at your side, help is only three numbers away. Dial 911 or other local emergency number in the case of fire, traffic accident, road hazard or medical emergency. Remember, it is a free call on your wireless phone!

9. Use your wireless phone to help others in emergencies. Your wireless phone provides you a perfect opportunity to be a “Good Samaritan” in your community. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call for emergency services. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle. You know to be stolen, call roadside assistance or other special non-emergency wireless number. For more information, please call to 888-901-SAFE, or visit our
Consumer Information on SAR (Specific Absorption Rate)

This Model Phone Meets the Government’s Requirements for Exposure to Radio Waves. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.

* Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer
you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for LG Arena phone when tested for use at the ear is 1.22 W/kg and when worn on the body, as described in this user’s manual, is 0.79 W/kg. (Body-worn measurements differ among phones models, depending upon available accessories and FCC requirements.) While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID BEJUN200. Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.ctia.org

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6
Safety Guidelines

watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Hearing Aid Compatibility (HAC) with Mobile Phones

When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box. The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T
Switch” or “Telephone Switch”) than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device. The more immune your hearing aid is, the less likely you are to experience interference noise from mobile phones.

To ensure that the Hearing Aid Compatibility rating for your phone is maintained, secondary transmitters such as Bluetooth® and WLAN components must be disabled during a call.
There are a variety of accessories available for your mobile phone. Consult your local dealer for availability. Optional items are sold separately.

**Battery Charger**
The battery charger allows you to charge your phone.

**Battery**
Standard battery is available.
Limited Warranty Statement

1. WHAT THIS WARRANTY COVERS:

LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

(1) The limited warranty for the product extends for TWELVE (12) MONTHS beginning on the date of purchase of the product with valid proof of purchase, or absent valid proof of purchase, FIFTEEN (15) MONTHS from date of manufacture as determined by the unit’s manufacture date code.

(2) The limited warranty extends only to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.

(3) This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S, including Alaska, Hawaii, U.S. Territories and Canada.

(4) The external housing and cosmetic parts shall be free of defects at the time of shipment and, therefore, shall not be covered under these limited warranty terms.

(5) Upon request from LG, the consumer must provide information to reasonably prove the date of purchase.

(6) The customer shall bear the cost of shipping the product to the Customer Service
Department of LG. LG shall bear the cost of shipping the product back to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

(1) Defects or damages resulting from use of the product in other than its normal and customary manner.

(2) Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized connections, unauthorized repair, misuse, neglect, abuse, accident, alteration, improper installation, or other acts which are not the fault of LG, including damage caused by shipping, blown fuses, spills of food or liquid.

(3) Breakage or damage to antennas unless caused directly by defects in material or workmanship.

(4) That the Customer Service Department at LG was not notified by consumer of the alleged defect or malfunction of the product during the applicable limited warranty period.

(5) Products which have had the serial number removed or made illegible.

(6) This limited warranty is in lieu of all other warranties, express or implied either in fact or by operations of law, statutory or otherwise,
including, but not limited to any implied warranty of marketability or fitness for a particular use.

(7) Damage resulting from use of non-LG approved accessories.

(8) All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.

(9) Products operated outside published maximum ratings.

(10) Products used or obtained in a rental program.

(11) Consumables (such as fuses).

3. WHAT LG WILL DO:

“LG will, at its sole option, either repair, replace or refund the purchase price of any unit that does not conform to this limited warranty. LG may choose at its option to use functionally equivalent re-conditioned, refurbished or new units or parts or any units. In addition, LG will not re-install or back-up any data, applications or software that you have added to your phone. It is therefore recommended that you back-up any such data or information prior to sending the unit to LG to avoid the permanent loss of such information.”

4. STATE LAW RIGHTS:

No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY, IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY HEREIN.
LG SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY APPLICABLE TO THIS PRODUCT. Some states do not allow the exclusive limitation of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

5. HOW TO GET WARRANTY SERVICE:

To obtain warranty service, please call or fax to the following telephone numbers from anywhere in the continental United States:

Tel. 1-800-793-8896 or Fax. 1-800-448-4026

Or visit http://us.lgservice.com. Correspondence may also be mailed to:

LG Electronics Service- Mobile Handsets
P.O. Box 240007, Huntsville, AL 35824

DO NOT RETURN YOUR PRODUCT TO THE ABOVE ADDRESS. Please call or write for the location of the LG authorized service center nearest you and for the procedures for obtaining warranty claims.
