About this user manual

Please read this user manual carefully before you use your phone and keep it handy for future reference.

Should your phone fail to operate correctly, refer to FAQ section.

• Some features and services may vary by area, phone, carrier, plan and version of phone software.
• Screen displays and illustrations on this user manual may differ from those you see on the actual phone.
• Designs and specifications of the phone and other accessories are subject to change without any notice.

For Your Safety .............................. 85
Important notice

Please check to see whether any problems you encountered with your phone are described in this section before taking the phone in for service or calling a service representative.

1. Phone memory
When available space in your phone memory is less than 10%, your phone cannot receive new messages. You need to check your phone memory and delete some data, such as applications or messages, to make more memory available.

Managing applications
1. In the Home screen, touch the Applications tab, then select Settings > Applications > Manage applications.
2. Once all applications appear, scroll to and select the application you want to uninstall.
3. Tap Uninstall, then touch OK to uninstall the application you selected.

2. Optimising battery life
Extend your battery's life between charges by turning off features you don't need to run constantly in the background. You can monitor how applications and system resources consume battery power.

Extending your battery's life
• Turn off radio communications you are not using. If you are not using Wi-Fi, Bluetooth or GPS, turn them off.
• Reduce screen brightness and set a shorter screen timeout.
• Turn off automatic syncing for Gmail, Calendar, Contacts and other applications.
• Some applications you have downloaded may cause your battery life to be reduced.

Checking the battery charge level
1. In the Home screen, touch the Applications tab, then select Settings > About phone > Status.
2. The battery status (Charging, Not charging) and level (percentage charged) is displayed at the top of the screen.

Monitoring and controlling what uses the battery
1. In the Home screen, touch the Applications tab, then select Settings > About phone > Battery use.
2. Battery usage time is displayed at the top of the screen. It tells you how long it has been since you last connected to a power source or, if connected to a power source, how long you were last running on battery power. The body of the screen lists applications or services using battery power, from greatest amount to least.

3. Installing an open source operating system
If you install and use an open source operating system (OS) on your phone rather than using the OS provided by the manufacturer, your phone may malfunction.
WARNING: If you install and use an OS other than the one provided by the manufacturer, your phone is no longer covered by the warranty.

WARNING: To protect your phone and personal data, only download applications from trusted sources, such as Android Market. If there are improperly installed applications on your phone, your phone may not work normally or a serious error may occur. You must uninstall those applications and all their data and settings from the phone.

4. Using unlock pattern

Set unlock pattern to secure your phone. This opens a set of screens that guide you through how to draw a screen unlock pattern.

Caution: Create a Google account before setting an unlock pattern.

WARNING: Precautions to take when using pattern lock.

It is very important to remember the unlock pattern you set. You will not be able to access your phone if you use an incorrect pattern 5 times. You have 5 opportunities to enter your unlock pattern, PIN or password. If you have used all 5 opportunities, you can try again after 30 seconds.

When you can’t recall your unlock Pattern, PIN, or Password:

If you have forgotten pattern: If you logged in to your Google account on the phone but failed to enter the correct pattern 5 times, tab the Forgot pattern button. You are then required to log in with your Google account to unlock your phone.
If you have not created a Google account on the phone or you forgot it, you have to perform a Hard reset.

**If you have forgotten PIN or Password:** If you forgot your PIN or Password, you need to do Hard reset.

**Caution:** If you perform a hard reset, all user applications and user data are deleted.

### 5. Using the hard reset

If it does not restore to the original condition, use hard reset to initialise your phone.

When the phone is turned off, press and hold the **Home** key + **Volume down** key + **Power** key for over ten seconds. When the screen shows the LG logo, release the **Power** key.

After the screen shows the hard reset screen, release the other keys.

Leave your phone for at least a minute while it performs the hard reset, then your phone will be turned on.

**Caution:** If you perform a hard reset, all user applications and user data are deleted. This cannot be reversed. Remember to back up any important data before performing a hard reset.
6. Connecting to Wi-Fi networks

To use Wi-Fi on your phone, you need to access a wireless access point or “hotspot.” Some access points are open and you can simply connect to them. Others are hidden or use security features; you must configure your phone to be able to connect to them.

Turn off Wi-Fi when you’re not using it to extend the life of your battery.

Turning Wi-Fi on and connecting to a Wi-Fi network

1. In the Home screen, touch the Applications tab, then select Settings > Wireless & networks > Wi-Fi settings.

2. Touch Wi-Fi to turn it on and begin scanning for available Wi-Fi networks.

   • A list of available Wi-Fi networks is displayed. Secured networks are indicated by a lock icon.

3. Touch a network to connect to it.

   • If the network is open, you are asked to confirm that you want to connect to that network by touching Connect.
   • If the network is secure, you’re asked to enter a password or other credentials. (Ask your network administrator for details)

4. The status bar displays icons that indicate Wi-Fi status.
7. Opening and switching applications

Multitasking is easy with Android because you can keep more than one application running at the same time. There's no need to quit an application before opening another. Use and switch between several open applications. Android manages each application, stopping and starting them as needed to ensure that idle applications don't consume resources unnecessarily.

Stopping applications

1. In the Home screen, touch the Applications tab, then select **Settings > Applications > Manage applications > select Running**.
2. Scroll to the desired application and touch **Stop** to stop it.

**TIP!** To return to recent applications, press and hold the Home key. The screen then displays a list of the applications you used recently.

8. Transferring music, photos and videos using USB mass storage devices

1. In the Home screen, touch the Applications tab, then select **Settings > Storage** to check out the storage media. (If you want to transfer files from or to a memory card, insert a memory card into the phone.)
2. Connect the phone to your PC using the USB cable.
3. **USB Mass Storage** mode screen will appear, and if you touch **Turn on USB Storage** button, your device connection would be recognized by PC.
4. Open the removable memory folder on your PC. You can view the mass storage content on your PC and transfer the files.

5. Copy the files from your PC to the drive folder.

6. When you are finished, select "Charge only" option to disconnect the phone.

9. **Hold your phone straight up**

   Hold your mobile phone straight up, as you would a regular phone. The LGL35G has an internal antenna. Be careful not to scratch or damage the back of the phone, as that causes loss of performance.

   While making/receiving calls or sending/receiving data, avoid holding the lower part of the phone where the antenna is located. Doing so may affect call quality.

10. **When the screen freezes**

    If the screen freezes or the phone does not respond when you try to operate it:

    Remove the battery, reinsert it, then turn the phone on. If it still does not work, please contact the service centre.

11. **Do not connect your phone when you turn on/off your PC.**

    Make sure you disconnect the data cable between your phone and PC; leaving it connected might cause errors on your PC.
Getting to know your phone

To turn on your phone, press and hold the Power key for 3 seconds. To turn off the phone, press and hold the Power key for 3 seconds, then touch Power off and OK.

**Speaker/Receiver**

**Power/Lock key**
Switch your phone on/off by pressing and holding this key. Turn off and lock the screen.

**Proximity sensor**

**Menu key**
Check what options are available.

**Home key**
Return to home from any screen.

**Back key**
Return to the previous screen.

**NOTE: Proximity sensor**
When receiving and making calls, the proximity sensor automatically turns the backlight off and locks the touch keypad by sensing when the phone is near your ear. This extends battery life and prevents the touch keypad from activating unintentionally during calls.

**WARNING: Precautions to take when using pattern lock.**
Placing a heavy object on the phone or sitting on it can damage its LCD and touch screen functions. Do not cover the protective film on the LCD’s proximity sensor. This may cause the sensor to malfunction.
Volume keys
- **On the home screen**: control ringer volume.
- **During a call**: control your In-Call volume.
- **When playing a track**: control volume continuously.

Stereo earphone connector

Power/Lock key

Back cover

Camera lens

Battery

microSD memory card slot

SIM card slot

Charger, micro USB cable connector
Installing the SIM card and battery

1. To remove the back cover, hold the phone in your hand firmly. With the other hand, firmly press your thumb on the back cover. Now lift off the back cover.

2. Slide the SIM card into the SIM card slot. Make sure the gold contact area on the card is facing downwards.
3. Insert the battery by aligning the gold contacts on the phone and the battery.

4. Replace the back cover of the phone.
Charging your phone

Insert the charger, then plug it into an electrical outlet. Your LGL35G must be charged before you see .

**NOTE:** The battery must be fully charged initially to improve battery lifetime.

Installing the memory card

**NOTE:** The LGL35G supports memory cards up to 32 GB.

To insert a memory card:

1. Turn the phone off before inserting or removing a memory card. Remove the back cover.
2. Insert the memory card into the slot. Make sure the gold contact area is facing downwards.

Removing a memory card
Carefully remove the memory card out of the slot.

⚠️ WARNING: Do not insert or remove the memory card when the phone is on. Doing so may damage the memory card as well as your phone, and the data stored on the memory card may be corrupted.

Formatting the memory card
Your memory card may already be formatted. If it isn’t, you must format it before you can use it.

NOTE: All files on the card are deleted when you format the card.

1. In the Home screen, touch the Applications tab to open the applications menu.
2. Scroll to and touch Settings > Storage.
3. Touch Unmount SD card and touch OK to confirm.
4. Touch Erase SD card, then confirm your choice.
5. If you have set a pattern lock, input the pattern lock then select Erase everything. The card is then formatted and ready to use.

NOTE: If there is content on your memory card, the folder structure may be different after formatting since all the files will be deleted.
Your Home screen

Touch screen tips
Here are some tips on how to navigate around your phone.

**Touch** – To choose a menu/option or open an application, touch it.

**Touch and hold** – To open an options menu or grab an object you want to move, touch and hold it.

**Drag** – To scroll through a list or move slowly, drag across the touch screen.

**Flick** – To scroll through a list or move quickly, flick across the touch screen (drag quickly and release).

**NOTE:**
- To select an item, touch the centre of the icon.
- Do not press too hard; the touch screen is sensitive enough to pick up a light, firm touch.
- Use the tip of your finger to touch the option you want. Be careful not to touch any other keys.

Lock your phone
When you are not using the LGL35G, press the power key to lock your phone. This helps prevent accidental presses and saves battery power.

Also, if you do not use the phone for a while, the Home screen or another screen you are viewing is replaced with the lock screen to conserve battery power.

If there are any programs running when you set the pattern, they may be still running in Lock mode. It is recommended that you exit all programs before entering the Lock mode to avoid unnecessary charges (e.g. phone
calls, Web access and data communications).

**Setting an unlock pattern:** you can draw your own unlock pattern by connecting the dots.

If you set a pattern, the phone screen locks. To unlock the phone, draw the pattern that you set on the screen.

**Caution:** When you set an unlock pattern, you need to create your Gmail account first.

**Caution:** If there are more than 5 pattern drawing errors in a row, you cannot unlock the phone. In this case, refer to the point-4 under the Important Notice.

**Unlock screen**

Whenever your LGL35G is not in use, it returns to the lock screen. Drag your finger from bottom to top to unlock the screen.

**Silent mode**

In the notification drawer, touch 🎭 to change 🗣 mode.

**Home**

Simply swipe your finger to the left or right to view the panels.

You can customise each panel with widgets, shortcuts (to your favourite applications), folders and wallpaper.

**NOTE:** Some screen images may be different depending on your phone provider.

In your Home screen, you can view quick keys at the bottom of the screen. Quick keys provide easy, one-touch access to the functions you use the most.
Touch the **Phone** icon to bring up the touch screen dialpad to make a call.

Touch the **Contacts** icon to open your contacts.

Touch the **Messaging** icon to access the messaging menu. This is where you can create a new message.

Touch the **Applications** tab at the bottom of the screen. You can then view all your installed applications.

To open the desired application, simply touch the icon in the applications list.

**NOTE:** Preloaded applications may differ according to your phone's software or your service provider.

**Adding widgets to your Home screen**

You can customise your Home screen by adding shortcuts, widgets or folders to it. For more convenience using your phone, add your favourite widgets to the Home screen.

1. In the Home screen, touch the **Menu** key and select **Add**. Or touch and hold the empty part of the home screen.

2. In the **Add to Home screen** menu, touch the type of item you want to add.

3. For example, select **Folders** from the list and tap it.

4. You then see a new folder icon on the Home screen. Drag it to the desired location on the desired panel, then take your finger off the screen.
TIP! To add an application icon to the Home screen from the Applications menu, touch and hold the application you want to add.

TIP! To remove an application icon from the Home screen, touch and hold the icon you want to remove, then drag it to the trash can.

NOTE: You cannot delete preloaded applications. (Only their icons can be deleted from the screen.)

Returning to recently-used applications
1. Press and hold the Home key. The screen displays a pop-up with icons of applications you used recently.
2. Touch an icon to open the application. Or touch the Back key to return to the current application.

Notification drawer
The notification drawer runs across the top of your screen.
Touch and slide the notification drawer down with your finger.
Or, in the Home screen, touch the **Menu** key and select **Notifications**. Here you can check and manage sound, Wi-Fi, Bluetooth and GPS as well as other notifications.

**Viewing the status bar**
The status bar uses different icons to display phone information such as signal strength, new messages, battery life and active Bluetooth and data connections.

Below is a table explaining the meaning of icons you’re likely to see in the status bar.

<table>
<thead>

**Onscreen keyboard**
You can enter text using the onscreen keyboard. The onscreen keyboard appears automatically on the screen when you need to enter text. To manually display the keyboard, simply touch a text field where you want to enter text.

**Using the keypad & entering text**
- 🖇️ Tap once to capitalise the next letter you type. Double tap for all caps.
- 📷 Tap to switch to the numeric and symbol keyboard. You can also touch and hold this tab to view the Settings menu.
- 📇 Tap to insert an emoticon when writing a message.
- 📑 Tap to enter a space.
- ⇧ Tap to create a new line in the message field.
- 🗑 Tap to delete the previous character.
- 🔔 Tap to hide the onscreen keyboard.
Entering accented letters

When you select French or Spanish as the text entry language, you can enter special French or Spanish characters (e.g. “á”).

For example, to input "á", touch and hold the "a" key until the zoom-in key grows bigger and displays characters from different languages. Then select the special character you want.
Google Account Set-up

When you first turn on your phone, you have the opportunity to activate the network, to sign into your Google account and how you want to use some Google services.

**To set up your Google account:**

* Sign into a Google account from the prompted set up screen.

OR

* **Applications** > select a Google application, such as **Gmail** > select **Next** > select **Create** to create a new account.

If you have a Google account, enter your e-mail address and password, then touch **Sign in**.

Once you have set up your Google account on your phone, your phone automatically synchronises with your Google account on the Web.

Your contacts, Gmail messages, calendar events and other information from these applications and services on the web are synchronised with your phone. (This depends on your synchronisation settings.)

After signing in, you can use Gmail and take advantage of Google services on your phone.
Wi-Fi

With Wi-Fi, you can use high-speed Internet access within the coverage of the wireless access point (AP).

Enjoy wireless Internet using Wi-Fi, without extra charges.

Turning on Wi-Fi

In the Home screen, open the notification drawer and touch .

Or touch Application > Settings > Wireless & networks, then Wi-Fi .

Connecting to Wi-Fi

Choose the Wi-Fi network you want to connect to. If you see , you need to enter a password to connect.

NOTE:

- If you are outside the Wi-Fi coverage area and choose 3G connection, additional charges may apply.
- If your phone goes into sleep mode when connected to Wi-Fi, the Wi-Fi connection is automatically disabled.
- In this case, if your phone has access to 3G data, it may connect to the 3G network automatically and additional charges may apply.
- The LGL35G supports WEP, WPA/WPA2-PSK and 802.1x EAP security.

If your Wi-Fi service provider or network administrator sets encryption for network security, enter the key into the pop-up window. If encryption is not set, this pop-up window is not shown. Obtain the key from your Wi-Fi service provider or network administrator.
Connecting to Bluetooth Devices

Bluetooth is on

Connected to a Bluetooth device

To turn Bluetooth on or off
1. From the Home screen, press the Menu Key.
3. Touch Bluetooth to turn the function on or off.

Connecting to Virtual Private Networks

Virtual private networks (VPNs) allow you to connect to resources inside a secured local network, from outside that network.

To add a VPN
1. From the Home screen, press the Menu Key.
3. Touch Add VPN.
4. Touch the type of VPN to add.
5. In the screen that opens, follow the instructions from your network administrator to configure each component of the VPN settings.
6. Press the Menu Key and touch Save.
   The VPN will be added to the list on the VPN settings screen.
Connecting to Mobile Networks

When you buy your phone and sign up for service, your phone is configured to use your provider’s mobile networks for voice calls and for transmitting data.

Different locations may have different mobile networks available. Initially, your phone is configured to use the fastest mobile network available for data. You can also configure your phone to access a different set of networks entirely, or to behave in specific ways when roaming.

To disable data when roaming

You can prevent your phone from transmitting data over other carriers’ mobile networks when you leave an area that is covered by your carrier’s networks. This is useful for controlling expenses if your cell plan doesn’t include data roaming.

1. Touch the Applications Key > Settings > Wireless & networks > Mobile networks > Data roaming.

2. Touch Data roaming to remove the checkmark from the box. With Data roaming unchecked, you can still transmit data with a Wi-Fi connection.
Working With Secure Certificates

If your organization’s VPN or Wi-Fi network relies on secure certificates, you must obtain the certificates and store them in your phone's secure credential storage before you can configure access to that VPN or Wi-Fi network on your phone. For specific instructions, contact your network administrator.

To install a secure certificate from the microSD card

1. Copy the certificate from your computer to the root (that is, not in a folder) of the microSD card.
2. From the Home screen, press the Menu Key.
3. Touch Settings > Location & security.
4. Touch Install from SD card.
5. Touch the file name of the certificate to install.
   - Only the names of certificates that you have not already installed on your phone are displayed.
6. If prompted, enter the certificate's password and touch OK.
7. Enter a name for the certificate and touch OK.
Calls

Making a call
1. Touch ☎️ to open the keypad.
2. Enter the number using the keypad. To delete a digit, touch the Clear icon ❯
3. Touch the Call icon ☎️ to make a call.
4. To end a call, touch the End icon ☎️.

TIP! To enter “+” to make international calls, touch and hold ☎️.

Calling your contacts
1. Touch 📞 to open your contacts.
2. Scroll through the contact list or enter the first letter(s) of the contact you want to call by touching Search.
3. In the list, touch the contact which you want to call and tap on the number or call icon to make call.

Answering and rejecting a call
When the screen is locked and your phone rings, drag the Answer icon ☎️ to the right.
Drag the Decline icon ☎️ to the left to reject an incoming call.

Adjusting call volume
To adjust the in-call volume during a call, use the Volume Up and Down key on the left side of the phone.
Making a second call
1. During your initial call, tap 
2. Dial the number, or search your contacts.
3. Touch the Call icon to connect the call.
4. Both calls are displayed on the call screen. Your initial call is locked and put on hold.
5. Touch the displayed number to toggle between calls. Or touch Merge calls to make a conference call.
6. To end active calls, touch End.
NOTE: You are charged for each call you make.

Viewing your call logs
In the Home screen, touch and choose the Call log tab.
View a complete list of all dialled, received and missed voice calls.

TIP! Touch any call log entry to view the date, time and duration of the call.

TIP! Touch the Menu key, then touch Delete all to delete all the recorded items.
Call settings
You can configure phone call settings such as call forwarding and other special features offered by your carrier.

1. In the Home screen, touch the Applications tab to open the applications menu.
2. Scroll and touch Settings.
3. Tap Call settings and choose the options that you want to adjust.
Contacts

Add contacts to your phone and synchronise them with the contacts in your Google account or other accounts that support contact syncing.

Searching for a contact

In the Home screen

1. Touch 📞 to open your contacts.
2. Touch Search Tab on the top and enter the contact name using the keyboard.

Adding a new contact

1. Touch 📞, enter the new contact’s number, then touch the Menu key. Touch Add to contacts and then Create new contact.
2. If you want to add a picture to the new contact, touch 📷. Choose from Capture picture or Pick from Gallery.
3. Select the contact type by touching 📩.
4. Touch a category of contact information and enter the details about your contact.
5. Touch Save.

Favorite contacts

You can classify frequently called contacts as favorites.

Adding a contact to your favorites

1. Touch 📞 to open your contacts.
2. Touch a contact to view its details.
3. Touch the star to the right of the contact’s name. The star turns gold.

**Removing a contact from your favorites list**

1. Touch 📘 to open your contacts.

2. Touch the **Groups** tab, select **Favorites** at the top of the list and choose a contact to view its details.

3. Touch the gold star to the right of the contact’s name. The star turns grey and the contact is removed from your favourites.
Messaging

Your LGL35G combines SMS and MMS into one intuitive, easy-to-use menu.

**Sending a message**

1. Touch 📮 icon on the home screen, and touch **New message** to open a blank message.
2. Enter a contact name or contact number in the **To** field. As you enter the contact name, matching contacts appear. You can touch a suggested recipient. You can add multiple contacts.

**NOTE:** You will be charged for a text message for every person you send the message to.

3. Touch **Enter message** field and start to compose your message.
4. Touch the **Menu** key to open the options menu. Choose from **Add subject, Discard, Attach, Insert smiley** and **All messages**.
5. Touch **Send** to send your message.
6. The message screen opens, with your message after Recipient Name/Number. Responses appear on the screen. As you view and send additional messages, a message thread is created.

⚠️ **WARNING:** The 160-character limit may vary from country to country depending on how the SMS is coded and in what language.
WARNING: If an image, video or audio file is added to an SMS, it will be automatically converted into an MMS, and you will be charged accordingly.

NOTE: When you get an SMS message during a call, there will be a ring notification.

Threaded box
Messages (SMS, MMS) exchanged with another party can be displayed in chronological order so that you can conveniently see an overview of your conversation.

Using Smilies
Liven up your messages using Smilies.
When writing a new message, touch the Menu key, then Insert smiley.

Changing your message settings
Your LGL35G message settings are predefined, so you can send messages immediately. You can change the settings based on your preferences.

WARNING: In this mode, the MMS Client device guides the user in creating and sending messages with content belonging to the Core MM Content Domain. This guidance is provided through warning dialogs.
Email

Opening Email and the Accounts Screen
You can use the Email application to read email from services other than Google Mail. The Email application supports the following account types: POP3, IMAP and Exchange.

Managing an email account
In the Home screen, touch Applications > Email, then select the Email Service Provider.

A setup wizard opens to help you add an email account. After the initial setup, Email displays the contents of your Inbox (if you have only one account) or the Accounts screen (if you have multiple accounts).

The Accounts screen
The Accounts screen lists your Combined Inbox and each of your email accounts.

1. Open the Email application. If you’re not on the Account screen, touch the Menu Key and touch Accounts.

2. Select the Email service provider.

- Touch to open your Combined Inbox, with messages received to all of your accounts.
- Touch to open a list of just your starred messages.
- Touch the folder icon to open the account’s folders.

You can touch an account to view its Inbox. The account from which you send email by default is indicated with a tick.
To open your Combined Inbox
If you have configured Email to send and receive email from more than one account, you can view all messages sent to all accounts in your Combined Inbox.

1. Touch Email.
2. Touch Combined inbox (in the Accounts screen). Messages in the Combined Inbox are colour coded along their left sides, by account, using the same colours that are used for your accounts in the Accounts screen.

Only your account’s most recent emails are downloaded to your phone. To download more (earlier) email messages, touch Load more messages at the bottom of the emails list.

Composing and Sending Email

To compose and send a message

1. While in the Email application, touch the Menu key and touch Compose.
2. Enter an address for the message’s intended recipient. As you enter text, matching addresses are offered from your Contacts. Separate multiple addresses with commas.
3. Touch the Menu key and then touch Add Cc/Bcc to send copy or blind copy of the mail to other contacts/email addresses.
4. Enter the text of the message.
5. Touch the Menu key and touch Add attachment to send a file with the message.
6. Touch the **Send** button.
If you’re not ready to send the message, touch the **Save as draft** button to save it in a **Drafts** folder. Touch a draft message in a **Drafts** folder to resume working on it. Your message will also be saved as a draft if you touch the **Back** key before sending it. Touch the **Discard** button to abandon and delete a message, including any saved drafts. If you aren’t connected to a network, for example, if you’re working in airplane mode, the messages that you send are stored in your **Outbox** folder until you’re connected to a network again. If it contains any pending messages, the **Outbox** is displayed on the Accounts screen.

Please note that messages sent using an Exchange account will not be located on the phone; they will, however, be located on the Exchange server itself.

If you want to see your sent messages in the **Sent** folder, then touch the **Menu** key and touch on **Folders** then touch on **Sent** folder and select **Refresh** from the options menu.

**TIP!** When a new email arrives in the inbox, you will receive a notification by sound or vibration.

---

**Working with Account Folders**

Each account has **Inbox**, **Outbox**, **Sent**, and **Drafts** folders. Depending on the features supported by your account’s service provider, you may have additional folders.
Adding and Editing email Accounts

1. To add an email account, touch the Applications tab and select Email.
2. Select MS Exchange or Others, and enter account settings.
3. If an email account is already set up, you need to touch the Menu key then tap Add account from Accounts screen.
4. Enter a name for the account, confirm how you want your name to appear in outgoing mail, then touch the Done button.

To change an account’s settings

1. Open the Accounts screen.
2. Touch and hold the account whose settings you want to change. In the menu that opens, touch Account settings.

To delete an email account

1. Open the Accounts screen.
2. Touch and hold the account you want to delete.
3. Touch Remove account in the menu that opens.
4. Touch the OK button in the dialog box to confirm that you want to delete the account.
Camera

Getting to know the viewfinder

1. **Zoom** - Zoom in or zoom out. Alternatively you can use the side volume keys.

2. **Brightness** - This defines and controls the amount of sunlight entering the image. Slide the brightness indicator along the bar towards "-" to lower the brightness of the image or towards "+" to increase it.

3. **Scene mode** - Choose from **Auto, Portrait, Landscape, Sports, Sunset** and **Night**.

4. **Image size** - Touch to set the size (in pixels) of the picture you take.

5. **Settings** - Touch this icon to open the advanced settings menu.

6. **Video mode** - Slide this icon down to switch to video mode.

7. **Taking a photo**

8. **Gallery** - Touch to view the last photo you captured. This enables you to access your gallery and view saved photos from within camera mode.
Taking a quick photo

1. Open the **Camera** application.
2. Hold the phone horizontally and point the lens towards the subject you want to photograph.
3. Press the capture button.

Once you’ve taken the photo

Your captured photo appears on the screen.

- **Share** Touch to share your photo using Bluetooth, Gmail, Google+, Messaging and Picasa.
- **Set as** Touch to use the image as a **Contact icon** or **Wallpaper**.
- **Rename** Touch to edit the name of the picture just taken.
- Touch to delete the image.
- Touch to take another photo immediately. Your current photo is saved.
- Touch to view the last photo you captured as well as the gallery.

Using the advanced settings

In the viewfinder, touch to open all advanced options.

Change camera settings by scrolling through the list. After selecting the option, touch the **Back** key.

**ISO** – The ISO rating determines the sensitivity of the camera's light sensor. The higher the ISO, the more sensitive the camera is. This is useful in darker conditions when you cannot use the flash.
White balance – Choose from Auto, Incandescent, Sunny, Fluorescent and Cloudy.

Color effect – Choose a colour tone for your new photo.

Timer – The self-timer allows you to set a delay after the capture button is pressed. Select Off, 3 secs., 5 sec or 10 secs. This is ideal if you want to be in the photo.

Shutter sound – Select one of four shutter sounds.

Auto review – If you turn Auto review on, it automatically shows you the picture you just took.

Tag location – Activate to use your phone's location-based services. Take pictures wherever you are and tag them with the location. If you upload tagged pictures to a blog that supports geotagging, you can see the pictures displayed on a map.

NOTE: This function is only available when GPS is active.

Storage – Choose whether to save your photos to the phone memory or to the external memory.

– Restore all camera default settings.

– Touch whenever you want to know how this function operates. This provides you with a quick guide.

TIP! When you exit the camera, some settings return to their defaults, such as white balance, color effect and timer. Check these before you take your next photo.
**TIP!** The Settings menu is superimposed over the viewfinder, so when you change elements of the image colour or quality, you see a preview of the image change behind the Settings menu.

**Viewing your saved photos**

Access your saved photos while in **Camera** mode. Just touch and touch the screen. You then see **Slideshow** and **Menu**.

**TIP!** Flick left or right to view other photos or videos.

- Touch to see a slideshow.
- Touch to share the contents or delete a photo. Touch **More** for more options.
  - **Details** – Check information on the content.
  - **Show on map**
  - **Set as** – Set as a contact icon or wallpaper.
  - **Crop** – Crop your photo. Move your finger across the screen to select the area.
  - **Rotate Left / Rotate Right** – Rotate left or right.
Video camera

Getting to know the viewfinder

1. **Zoom** - Zoom in or zoom out. Alternatively you can use the side volume keys.
2. **Brightness** - This defines and controls the amount of sunlight entering the video. Slide the brightness indicator along the bar towards "-" to lower the brightness of the video or towards "+" to increase it.
3. **Video size** - Touch to set the size (in pixels) of the video you record.
4. **Audio recording** - Choose Mute to record a video without sound.
5. **Settings** - Touch this icon to open the advanced settings menu.
6. **Camera mode** - Slide this icon up to switch to camera mode.
7. **Start recording**
8. **Gallery** - Touch to view the last video you recorded. This enables you to access your gallery and view your saved videos from within video mode.
Shooting a quick video

1. Slide the Camera mode button down and the icon changes to 📹.
2. The video camera viewfinder appears on the screen.
3. Holding the phone horizontally, point the lens towards the subject you want to capture in your video.
4. Touch the Record 🎬 button once to start recording.
5. REC appears at the bottom of the viewfinder with a timer showing the length of the video.
6. Touch 🎬 on the screen to stop recording.

After shooting a video

A still image representing your video will appear on the screen.

- **Play**  Touch to play the video.
- **Share**  Touch to share your video using Bluetooth, Gmail, Messaging and YouTube.
- **Rename**  Touch to edit the name of the selected video.
- 🗑  Touch to delete the video you just made. Confirm by touching OK. The viewfinder reappears.
- 📈  Touch to shoot another video right away. Your current video is saved.
- 📈  Touch to view the last recorded video as well as the gallery.
Using the advanced settings

Using the viewfinder, touch 🛠️ to open all the advanced options. Adjust the video camera setting by scrolling through the list. After selecting the option, touch the Back key.

**White balance** – White balance ensures that the white areas in your video are realistic. To enable your camera to adjust the white balance correctly, you may need to determine the light conditions. Choose from **Auto, Incandescent, Sunny, Fluorescent** and **Cloudy**.

**Color effect** – Choose a colour tone to use for your new view.

**Auto review** – Auto review automatically shows you the video you just recorded.

**Storage** – Choose whether to save your video clip to the phone memory or to the external memory.

- Restore all video camera default settings.
- Touch if you want to know how this function operates. This provides you with a quick guide.

**Watching your saved videos**

1. In the viewfinder, touch 🎥.
2. Your gallery appears on the screen.
3. Touch a video once to bring it to the front of the gallery. It starts playing automatically.
Adjusting the volume when viewing a video

To adjust the volume of a video while it is playing, use the volume keys on the left-hand side of the phone.
**Multimedia**

**Preloaded App**

There are useful applications preloaded on the **Preloaded Apps**. To use the application, you need to install the application to your phone first.

*NOTE:* Preloaded applications may differ according to your phone’s software or your service provider.

**Gallery**

Touch the **Applications** tab, then select **Gallery**. Open a list of catalogue bars that store all your multimedia files.

**View mode**

Touch **Gallery**. Folder view is displayed.

Touch any folder and it turns to grid view mode. If you tap a photo, it changes into full view mode.

**Timeline view**

LGL35G **Gallery** provides a timeline view of your photos and videos. In grid view mode, drag to the right and the date you took your photos is displayed, starting with the most recent. If you select a specific date, all the photos you took on that day are grouped.

**Music**

Your LGL35G has a built-in music player that lets you play all your favourite tracks. To access the music player, touch **Applications**, then touch **Music**.
Playing a song

1. In the Home screen, touch the Applications tab and select Music.
2. Touch Songs.
3. Select the song you want to play.
4. Touch to pause the song.
5. Touch to skip to the next song.
6. Touch to go back to the beginning of the song. Touch twice to return to the previous song.

To change the volume while listening to music, press the up and down volume keys on the left-hand side of the phone.

Touch and hold any song in the list. It displays Play, Add to playlist, Use as ringtone, Delete, Details, Share and Search as options.

**NOTE:** Music file copyrights may be protected by international treaties and national copyright laws. Therefore, it may be necessary to obtain permission or a licence to reproduce or copy music.

In some countries, national laws prohibit private copying of copyrighted material. Before downloading or copying the file, check the national laws of the relevant country concerning the use of such material.
Transferring files using USB mass storage devices

To transfer files using USB devices
1. Connect the LGL35G to a PC using a USB cable.
2. USB Mass Storage mode screen will appear, and if you touch Turn on USB Storage button, your device connection would be recognized by PC.
3. Open the removable memory folder on your PC. You can view the mass storage content on your PC and transfer the files.
4. Copy the files from your PC to the drive folder.
5. When you are finished, select “Charge only” option to disconnect the phone.

How to transfer music/video files to your phone
1. Connect your phone to the PC using the USB cable.
2. USB Mass Storage mode screen will appear, and if you touch Turn on USB Storage button, your device connection would be recognized by PC.
3. Transfer music or video files from the PC to the phone's removable storage.
   • You can copy or move files from your PC to your phone's removable storage using a card reader.
   • If there is a video file with a subtitle file (*.srt file with the same name as the video file), place it in the same folder to display subtitles automatically when playing the video file.
・When downloading music or video files, copyrights must be secured. Note that corrupted files or files with incorrect extensions may damage your phone.

**Sending data from your phone using Bluetooth**

**Sending data using Bluetooth** You can use Bluetooth to send data by running a corresponding application, not from the Bluetooth menu as on most other mobile phones.

* **Sending pictures:** Run the Gallery application, then select Picture > Menu. Click Share, then select Bluetooth. Check whether Bluetooth is turned on, then select Scan for devices. Choose the device you want to send data to from the list.

* **Exporting contacts:** Run the Contacts application. Touch the address you want to export to. Touch the Menu key and select Share > Bluetooth. Check whether Bluetooth is turned on, then select Scan for devices. Choose the device you want to send data to from the list.

* **Sending multi-selected contacts:** Run the Contacts application. To select more than one contact touch the Menu key and touch Share. Select the contacts you want to send or touch Select all option from top > Select Share > Bluetooth > Enable Bluetooth and select Scan for devices > Choose the device you want to send data from the list.

* **Connecting to FTP (only FTP server is supported on this handset):** Select Settings > Wireless & networks > Bluetooth settings. Select the
Discoverable box so you can search for your phone on other devices. Find the FTP service and connect to the FTP server.

• If you want to search for this phone from other devices, go to Settings > Wireless & networks > Bluetooth settings. Select the Discoverable box. The box is cleared after 120 seconds.
Utilities

Setting your alarm
1. In the Home screen, touch the Applications tab and select Clock.
2. If you want to add a new alarm, touch and select Add alarm.
3. Set the time to turn on the alarm. After you set the time, the LGL35G lets you know how much time is left before the alarm will sound.
4. Set Repeat, Ringtone or Vibrate, then add a label to name the alarm. Touch Done.

NOTE: to change alarm settings on alarm list screen, touch the Menu key and select Settings. You can adjust the below options: Alarm in silent mode, Alarm volume, Snooze duration and Side button behaviour.

Using your calculator
1. In the Home screen, touch the Applications tab and select Calculator.
2. Touch the number keys to enter numbers.
3. For simple calculations, touch the function you want (+, −, x or ÷) followed by =.
4. For more complex calculations, touch the Menu key, touch the Advanced panel, then choose sin, cos, tan, log and so on.

Adding an event to your calendar
1. In the Home screen, touch the Applications tab and select Calendar.
2. To check the event, touch the date. Touch and hold if you want to add a new event. Touch New event.
3. Touch **What** then enter the event name. Check the date and enter the time you want your event to start and finish.

4. Also, touch **Where** then enter the location.

5. If you want to add a note to your event, touch **Description** and enter the details.

6. If you want to repeat the alarm, set **Repetition**, and set **Reminders**, if necessary.

7. Touch **Done** to save the event in the calendar. A coloured square in the calendar marks all days that have saved events. An alarm sounds at the event start time to help you stay organised.

**Changing your calendar view**

1. In the Home screen, touch the **Applications** tab and select **Calendar**. Touch the **Menu** key.

2. Select the calendar view for a particular day, week or month.

**Voice recorder**

Use the voice recorder to record voice memos or other audio files.

**Recording a sound or voice**

1. In the Home screen, touch the **Applications** tab and select **Voice Recorder**.

2. Touch 🎤 to begin recording.

3. Touch 🎧 to end the recording.
4. Touch ❯ to listen to the recording.

NOTE: touch 📀 to access your album. You can listen to the saved recording.
Notice: the available recording time may differ from the real time.

Sending the voice recording

1. Once you have finished recording, you can send the audio clip by touching Menu > Share.

2. Choose from Bluetooth, Gmail Messaging. When you select Gmail and Messaging, the voice recording is added to the message, then you write and send the message normally.

Polaris Viewer

Polaris Viewer is a professional mobile office solution that lets users conveniently view various types of office documents, including Word, Excel and PowerPoint files, anywhere, anytime, using their mobile devices.

Managing files

Polaris Viewer provides mobile users with convenient file management features, including copying, pasting, renaming and deleting files and folders right on the device.

Viewing files

Mobile users can now easily view a wide variety of file types, including Microsoft Office documents and Adobe PDF, right on their mobile devices. When viewing documents using Polaris Viewer, the objects and layout remain the same as in their original documents.
App Manager

You can manage your applications with App Manager. You can easily check the number of currently running applications and shut down applications. You can also uninstall the applications you have installed on your device.
The Web

Browser
Browser gives you a fast, full-colour world of games, music, news, sport, entertainment and much more, right on your mobile phone. Wherever you are and whatever you enjoy.

NOTE: additional charges apply when connecting to these services and downloading content. Check data charges with your network provider.

Using the web toolbar

Touch to go backwards one page.
Touch to go forwards one page to the one you connected to after the current page. This is the opposite of what happens when you press the Back key, which goes to the previous page.

Touch to show all your open windows.

Touch to add a new window

Add/show bookmark and show Most visited, Read it later and History.

Using options

Touch the Menu key to view options.

Read it later – Add the current web page in read it later.

Add RSS feed – Add the current web page to the RSS feed.

Share page – Allows you to share the web page with others.

Find on page – Allows you to find letters or words on the current web page.
Select text – Allows you to copy any text from the web page.

More

• Home page: Go to the Home page.
• Set home page: Set the current web page as your Home page.
• Add shortcut to home: Add the shortcut of the current web page to the Home screen.
• Page info: Displays the web page information.
• Downloads: Displays your download history.
• Settings: Change web browser settings.

TIP! To return to the previous web page, press the Back key.
In the Home screen, touch the Applications tab then scroll to and touch Settings.

**Wireless & networks**

Here, you can manage Wi-Fi and Bluetooth. You can also set up mobile networks and switch to airplane mode.

**Airplane mode** – After switching to airplane mode, all wireless connections are disabled.

**Wi-Fi** – Touch to select: This turns on Wi-Fi to connect to available Wi-Fi networks.

**Wi-Fi settings** – Allows you to set up and manage wireless access points. Set network notification, or add a Wi-Fi network. The advanced Wi-Fi settings screen is accessed from the Wi-Fi settings screen. Touch the Menu key and touch Advanced.

**TIP! How to obtain the MAC address**

To set up a connection in some wireless networks with MAC filters, you may need to enter the MAC address of your LGL35G into the router. You can find the MAC address in the following user interface: Touch Applications > Settings > Wireless & networks > Wi-Fi settings, and touch the Menu key. Then select Advanced > MAC Address.

**Bluetooth** – Touch to select: This turns on Bluetooth to connect to Bluetooth devices.
Bluetooth settings – Set device name & discoverable mode, scan for other devices. Or, check a list of Bluetooth devices that you’ve previously configured and those detected when the phone last scanned for Bluetooth devices.

VPN settings – Displays the list of Virtual Private Networks (VPNs) that you’ve previously configured. Allows you to add different types of VPN.

Mobile networks – Set options for data roaming, network mode & operators, access point names (APNs) and so on.

Call settings

< Fixed dialing numbers >
Select Fixed dialing numbers to turn on and compile a list of numbers that can be called from your phone. You’ll need your PIN2, which is available from your operator. Only numbers within the fixed dial list can be called from your phone.

< Voicemail >
Voicemail service – Allows you to select your carrier’s voicemail service.
Voicemail settings – If you are using your carrier’s voicemail service, this option allows you to enter the phone number to use for listening to and managing your voicemail.
< Other call settings >

Excuse messages – When you want to reject a call, you can send a quick message using this function. This is useful if you need to reject a call during a meeting.

Call forwarding – Choose whether to divert all calls, when the line is busy, when there is no answer or when you have no signal.

Call duration – View the duration of calls including last call, all calls, dialled calls and received calls.

Additional settings – This lets you change the following settings:

Caller ID: Choose whether to display your number on an outgoing call. (This service is network dependent; some operators do not support this function)

Call waiting: If call waiting is activated, the handset will notify you of an incoming call while you are on another call (depending on your network provider).
Sound

< General >

Silent mode – Allows you to mute all sounds (including call and notification ringtones) except the audio from music and videos and any alarms you have set. You must mute media and alarm sounds in their own applications.

Vibrate – Allows you to set your phone to vibrate when you receive an incoming call.

Volume – Allows you to set the volume for ringtones, media and alarms. If you deselect the option to use the incoming call volume for notifications, you can set the volume for incoming calls and notifications separately.

< Incoming calls >

Phone ringtone – Allows you to set your default incoming call ringtone.

< Notifications >

Notification ringtone – Allows you to set your default notification ringtone.

< Feedback >

Audible touch tones – Allows you to set the phone to play tones when using the dialpad to dial numbers.

Audible selection – Allows you to set your phone to play a sound when you touch buttons, icons and other onscreen items that react to your touch.

Screen lock sounds – Allows you to set your phone to play a sound when locking and unlocking the screen.
**Display**

**Brightness** – Adjust the screen brightness.

**Auto-rotate screen** – Set to switch orientation automatically when you rotate the phone.

**Animation** – Set to display an animation.

**Screen timeout** – Set the time for screen timeout.

**Location & security**

**Use wireless networks** – If you select Use wireless networks, your phone determines your approximate location using Wi-Fi and mobile networks. When you select this option, you’re asked whether you consent to allowing Google to use your location when providing these services.

**Use GPS satellites** – If you select Use GPS satellites, your phone determines your location to street level accuracy.

**Set up screen lock** – Set an unlock pattern to secure your phone. Opens a set of screens that guide you through drawing a screen unlock pattern. You can set a PIN or password instead of a pattern or leave it as None. When you turn on your phone or wake up the screen, you’re asked to draw your unlock pattern to unlock the screen.

**Set up SIM card lock** – Set up SIM card lock or change the SIM PIN.

**Visible passwords** – Select to show passwords as you type them or deselect to hide passwords as you type them.

**Select device administrators** – Add one or more administrators.
Use secure credentials – Allows you to access secure certificates.

Install from SD card – Choose to install encrypted certificates from your SD card.

Set password – Set or change the credential storage password.

Clear storage – Clear credentials for all content and reset password.

Applications
You can manage applications and set up quick launch shortcuts.

Unknown sources – Default setting to install non-Market applications.

Manage applications – Manage and remove installed applications.

Running services – Check services that are currently running.

Storage use – View storage used by applications.

Battery use – See what has been using the battery.

Development – Set options for application development.

Accounts & sync
< General sync settings >

Background data – Permits applications to synchronise data in the background, whether or not you are actively working in them. Deselecting this setting can save battery power and lowers (but does not eliminate) data usage.

Auto-sync – Permits applications to synchronise, send and receive data to their own schedule.
< Manage accounts >
List of all Google accounts and other accounts you've added to your phone. If you touch an account in this screen, its account screen opens.

Privacy
Change the settings for managing your settings and data.
- **Back up my data:** Set to back up your settings and application data to the Google server.
- **Automatic restore:** Set to restore your settings and application data when the applications are reinstalled on your device.
- **Factory data reset:** Reset your settings to the factory default values and delete all your data. If you reset the phone in this way, you are prompted to reenter the same information as when you first started Android.

Storage
< USB connection mode >
Allows you to turn the Mass storage only mode.

< Internal memory >
Check total available internal memory space. Touch Erase internal memory if you want to delete all data from the internal memory.

< SD card >
Check total available SD card space. Touch Unmount SD card for safe removal. Erase SD card if you want to delete all data from the SD card.
< System memory >
Checks the available space.

Language & keyboard
Set local language and region as well as keyboard settings.

Voice input & output

< Voice input >
Voice recogniser settings – Use the Voice recogniser settings to configure
the Android voice input feature.

• Language: Opens a screen where you can set the language you use for
speech to enter text.

• SafeSearch: Opens a dialog where you can set whether you want the
Google SafeSearch filter to block some results.

• Block offensive words: When deselected, Google voice recognition will
recognise and transcribe words many people consider offensive, when
you use speech to enter text. When selected, Google voice recognition
replaces those words in transcriptions with a placeholder comprised of
star symbols ( * ).

< Voice output >
Text-to-speech settings – Use the Text-to-speech settings to configure
the Android text-to-speech synthesiser for applications that can use this
feature.
NOTE: if you don’t have speech synthesiser data installed, only the Install voice data setting is available.

- **Listen to an example**: Plays a brief sample of the speech synthesiser, using your current settings.
- **Always use my settings**: Tick to use the settings on this screen in place of speech synthesiser settings available in other applications.
- **Default Engine**: Opens a dialog where you can set the text-to-speech application you want to use, if you have more than one installed.
- **Install voice data**: If your phone does not have speech synthesiser data installed, this connects to Android Market and guides you through the process of downloading and installing the data. This setting is not available if the data is already installed.
- **Speech rate**: Opens a dialog where you can select how quickly you want the synthesiser to speak.
- **Language**: Opens a dialog where you can select the language of the text you want the synthesiser to read. This is particularly useful in combination with **Always use my settings** to ensure that text is spoken correctly in a variety of applications.
- **Pico TTS**: Configure the Pico TTS settings.

**Accessibility**

Use the **Accessibility** settings to configure accessibility plug-ins you have installed on your phone.

**NOTE:** requires additional plug-ins.
Date & time
Use Date & time settings to set your preference for how dates are displayed. You can also use these settings to set your own time and time zone rather than obtaining the current time from the mobile network.

For Your Safety

The highest SAR value for this model phone when tested for use at the ear is X.XX W/kg and when worn on the body, as described in this user guide, is X.XX W/kg (body-worn measurements differ among phone models, depending upon available accessories and FCC requirements).

While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/ea/fccid/ after searching on FCC ID.
