Quick feature reference

Pull off the road and park before making or answering a call if driving conditions or the law should require it. Should ALWAYS keep the phone more than six (6) inches from their pacemaker when the phone is turned ON; do not carry the phone in a breast pocket:

• Should use the ear opposite the pacemaker to use hands-free operation, if available; turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

Give full attention to driving -- driving safely is your first responsibility.
